Camber Pharmaceuticals Launches Generic Bentyl®

Piscataway, NJ, 1BNovember 4, 2019– Camber Pharmaceuticals is pleased to announce the addition of Dicyclomine Hydrochloride Injectable to our growing portfolio of products.

Dicyclomine Hydrochloride Injectable is the generic version of Bentyl® from Allergan and is used to treat functional bowel or irritable bowel syndrome. Dicyclomine Hydrochloride Injectable is available in a 20mg/2 mL- 5x2mL single dose vials.

“Camber has had a remarkable track record of launching oral solid and oral liquid ANDA products successfully in the US market place. Now with the launch of our first injectable product, Camber is transitioning into the more complex generics space. We plan to launch more injectable products in 2020 as part of our growth and product diversification strategy”- Commented Arun Nataraj , Vice-President of Business Development.

Camber’s commitment to its customers is to bring the highest quality generic pharmaceuticals to the market and provide a level of excellence in service, supply and affordability.

Camber Pharmaceuticals is a fully integrated international pharmaceutical company that maintains quality and integrity in all its products. Its parent company, Hetero Drugs of Hyderabad India, is one of the world’s leading API and finished dosage manufacturers. Camber’s commitment to the consumer is to bring the highest quality generic pharmaceuticals to the market to improve quality of life through cost-effective medications.
